Manthan Mittal

+91 82006 81650 | manthanmittal93@gmail.com | manthanmittal.in | linkedin.com/in/manthanmittal-703502168

PROFESSIONAL SUMMARY

AI/ML Engineer with an MSc in Artificial Intelligence and experience in language models, agentic AI, RAG systems and deployed ML services.

TECHNICAL SKILLS

Python | Scikit-learn | Pandas | TypeScript | JavaScript | SQL | Java | C++ | Rust | Agentic AI | LLM | RAG | Deep Learning | NLP | GNN | AI Explainability | XGBoost | FAISS | Recommender Systems | Docker

PROFESSIONAL EXPERIENCE

KrishaWeb | AI & ML Engineer | July 2026 - Present | Remote

- Build Python ETL pipelines using Pandas and NumPy to clean and structure industrial sensor data for predictive modelling.
- Develop anomaly detection workflows for equipment efficiency on live production systems.

PolyAI | AI & ML Engineer | July 2025 - April 2026 | London, United Kingdom

- Designed and trained smaller language models from scratch, owning architecture and the end-to-end training pipeline.
- Took models from design to production deployment with product and engineering teams for enterprise requirements.

AI & ML Intent | AI & ML Engineer | February 2025 - July 2025 | London, United Kingdom (Remote)

- Built predictive models with Python, Scikit-learn and XGBoost to forecast industrial business performance and operational trends.
- Cleaned and transformed large raw datasets for downstream analysis.

Freelance | Software & AI Developer | 2019 - Present

- Own greenfield AI and full-stack applications from prototype to production with FastAPI, Flask, REST APIs and React/TypeScript.
- Design agentic AI workflows and LLM-powered tools for document processing and complex querying.

Silver Touch Technologies Ltd | Android Developer | January 2022 - June 2022 | Ahmedabad, Gujarat, India

- Developed native Android applications to improve user interaction and stability.
- Diagnosed and resolved over 30 software issues.

SELECTED PROJECTS

Scientific Data Imputation Software

- Developed software for the NHANES public health dataset using Python, Pandas, Scikit-learn, KNN and MICE for missing-value imputation.

Property Recommendation Pipeline (Roxi Residences)

- Processed search, click and wishlist logs with Pandas/NumPy and containerised the application with Docker.
- Integrated GNNs and an LLM-powered explainability layer for transparent recommendation reasoning.

EDUCATION

University of Essex | MSc in Artificial Intelligence | October 2023 - November 2024 | United Kingdom

GTU / Ahmedabad Institute of Technology | B.E. in Information Technology | 2018 - 2022 | Gujarat, India

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate | Usable Security | Programming with Python and IoT Perspective - Panjab University (2021)
